Alignment and Modifications

The "easy" box: Check below for our 'normal' mods and alignment and allowing us to use CPO common sense while making your socket

Standard Additive Socket (Easy mode)
BK: 5 deg flexion, 5 deg adduction, 3% reduction from measurements. Fib head, Tibial crest, and distal Tib reliefs, mild PTB bar.
AK: 5 def Flexion, 5 deg adduction, 3% reduction, soft IC.

***We will call/contact you if anything seems out of the ordinary or we require extra info
